## PROFILE

My career has centered around the web from continuous deployment to css. I can contribute at any level of the stack and train a team to take features from vague specifications to continuously integrated deployment. I firmly believe an ergonomic developer experience leads to a higher quality product.

## TECHNICAL STACK

**Platforms:** Reactive web, \*nix backend, mobile hybrid, native android/iOS

**Languages:** Typescript, javascript, html5/scss, java, python, rust, golang, swift, +others

**Frameworks:** React, react-native, django, node, wordpress, drupal

**Ops:** Bash scripting, docker, continuous integration/deployment, bare metal or cloud

**Focuses:** Project architecture, process definition, developer ergonomics

**Collaboration:** Agile-like, git workflow, internal chat, code review, standups, kanban tasks

## EDUCATION

BS, Industrial Engineering, California Polytechnic State University

## HIGHLIGHTED PROFESSIONAL EXPERIENCE

**503 Collective** (1/19 - 9/19) - Technical Lead

Lead a 5 member development team on a wide reaching **greenfield website and app rebuild** for a large car auction company using **react and react native**. Included significant middleware, legacy system integration, and business process refinement
